

Boom in orders at the well-established HSE management software EcoWebDesk

Berlin, January 28, 2014 – The Berlin based HSE management software provider has reinforced its market position in 2013. EcoIntense GmbH registered a major increase across all areas for the whole business year; particularly incoming orders, in the fourth quarter of 2013, rose by 300 per cent as compared to the same period of the preceding year. In addition to the increased number of new users more and more large companies tend to conclude long term licenses for the use of the web-based software EcoWebDesk. This attests to the development of EcoIntense GmbH as the established partner for HSE management, backed up by the very positive results of the fall 2013 customer survey. Some of the most recent new users of the software are the Cologne based chemical company INEOS and the international manufacturer of braking systems for rail vehicles, Knorr-Bremse GmbH.

The robust growth has lead to the inevitable decision to increase the international business activity of EcoIntense GmbH. In order to better service international companies and to increase business from new customers, EcoIntense GmbH launched the first overseas branch, in Houston, Texas (USA), at the beginning of this year.
