

EcoWebDesk 7.0 – Analyze big data with a click of a button

Visualize all key indicators with the latest release of the off-the-shelf software solution for occupational health, safety and environmental (HSE) management

Berlin, July 29, 2014 – The off-the-shelf software solution EcoWebDesk in the latest version 7.0 now offers multidimensional analysis of HSE data. The complete make-over of the calculation engine allows for a transparent and efficient visualization of all indicators. In the Audit Management module, for instance, large data can now be summarized in pivot tables and the graphical representation is now clearer and more detailed at the same time. Even the most inexperienced user is now able to quickly generate data analyses. This new concept will be available in other modules in the next release planned later this year.

Additionally, quick access to all data records in EcoWebDesk 7.0 has been improved. For example, actions that the user is involved in are displayed within seconds thanks to individual and standardized filters. Manipulating multiple data records at the same time will save time in the Hazardous Materials module.

All the new functions in EcoWebDesk 7.0 guarantee a more convenient and efficient execution of your HSE tasks. The latest release of the software will be showcased from August 25 to August 28 at the international safety and health trade fair *Arbeitsschutz Aktuell* in hall 3.1, booth 31C23, in Frankfurt am Main, Germany.

EcoWebDesk® is a comprehensive and integrated off-the-shelf software solution for occupational health, safety and environmental (HSE) management. In EcoWebDesk key indicators and business goals can be aligned with operational requirements, environmental protection regulations, legal norms as well as workplace safety requirements and risk management. The software is fully compliant with DIN EN ISO 14001, 50001 and OHSAS 18001, officially confirmed by the global DEKRA Group. EcoIntense GmbH is certified according to DIN EN ISO 9001. The company is headquartered in Berlin, Germany. Further offices are located in Lower Saxony and Bavaria (Germany) as well as in Houston, Texas (USA).
