HSE software EcoWebDesk at ACHEMA

EcoIntense with the new EcoWebDesk 7.3 for the first time at the leading trade fair for the process industries in Frankfurt

Berlin, June 25, 2015 – EcoIntense, the software company based in Berlin, participated for the first time in the trade fair ACHEMA, where it showcased the extended language concept of the EcoWebDesk version 7.3. At the leading trade fair for the process industries, which was held from June 15 to 19, visitors gained an insight into the new features and updates of the web-based HSE software (Health, Safety and Environment). One of the most important features for the international visitors was the extension of the user interface to six languages. Globally operating companies can now perform all HSE tasks in German, English, Chinese, Spanish, Portuguese and Czech.

With the extended language concept, customers can now provide online safety instructions for guests and third parties in 15 languages. Organizations can conduct their individual safety instructions with EcoWebDesk at a terminal on-site or prior to the visit online. The system automatically documents all acquired qualifications, making sure that every visitor has received all necessary safety instructions.

Due to the latest software update users can much easier manage all data and tasks in the health and safety as well as hazardous materials management. All employees are now linked to their activities, so it is always clear which hazardous materials and situations they are exposed to in their daily work. The software automatically compares each activity to the existent and required qualifications, verifying that they match. As a result, companies can ensure health protection of their employees at all times.

EcoWebDesk® is a comprehensive and integrated off-the-shelf software solution for occupational health, safety and environmental (HSE) management. In EcoWebDesk key indicators and business goals can be aligned with operational requirements, environmental protection regulations, legal norms as well as workplace safety requirements and risk management. The software is fully compliant with DIN EN ISO 14001, 50001 and OHSAS 18001, officially confirmed by the global DEKRA Group. EcoIntense GmbH is certified according to DIN EN ISO 9001. The company is headquartered in Berlin, Germany. Further offices are located in Lower Saxony and Bavaria (Germany) as well as in Houston, Texas (USA).
