Sustainability software EcoWebDesk 8.0
EcoIntense adds sustainability module to the HSE software

Berlin, September 24, 2015 – The latest software release EcoWebDesk 8.0 can help companies improve their sustainability management. Organizations can now analyze all actions and their long-term impacts with regard to environmental, social and employee issues.

The new software module enables the entire process of sustainability reporting to be carried out in a transparent and verifiable way: from data collection, transfer and approval to the evaluation. Sustainability indicators can either be defined individually or selected from standardized catalogs, for example, according to GRI (Global Reporting Initiative).

Complementing its product portfolio in the area of health, safety and environmental management with a greatly effective tool for sustainability management, EcoIntense has created synergies with the other modules, such as Eco-Controlling, Health & Safety, Hazardous Materials and Legal Compliance. 'This groundbreaking approach enables our customers to fulfill all their reporting duties in sustainability management faster and more efficiently than ever. With EcoWebDesk, software users collect all kinds of important data, which they can now easily trasfer into a customized sustainability report', says CEO Markus Becker.

EcoIntense will present the new software release from October 27 to 30 at the international trade fair A+A in Düsseldorf, where the company exhibits in hall 6, booth C37.

EcoWebDesk® is a comprehensive and integrated off-the-shelf software solution for occupational health, safety and environmental (HSE) management as well as sustainability management. In EcoWebDesk, key indicators and business goals can be aligned with operational requirements, environmental protection regulations, legal norms as well as workplace safety requirements and risk management. The software is fully compliant with DIN EN ISO 14001, 50001 and OHSAS 18001, officially confirmed by the global DEKRA Group. EcoIntense GmbH is certified according to DIN EN ISO 9001. The company is headquartered in Berlin, Germany. Further offices are located in Lower Saxony and Bavaria (Germany) as well as in Houston, Texas (USA).
