Software for offline audits

Conducting site inspections on the go with EcoWebDesk

Berlin, May 11, 2016 – With the HSE software EcoWebDesk users can now carry out audits offline. The internet or intranet connection is no longer necessary during site inspections starting from the latest software release 8.2.1. Questions defined in advance can be exported from the software into an Excel template containing all information required for audits. Answers and assessments are entered offline on mobile devices from any location. All documented results can be imported into EcoWebDesk at the click of a mouse and are immediatly available for customized assessement.

The software company EcoIntense developed the new offline function as a solution for customers in the manufacturing industry. As a rule, Software as a Service products require an internet connection which is often not available during site audits in large production halls or at construction sites.

EcoWebDesk is a comprehensive and integrated off-the-shelf software solution for occupational health, safety and environmental (HSE) management as well as sustainability management. In EcoWebDesk, key indicators and business goals can be aligned with operational requirements, environmental protection regulations, legal norms as well as workplace safety requirements and risk management. The software is suitable for management systems according to ISO 14001, ISO 50001 and OHSAS 18001 as confirmed by DEKRA Assurance Services. EcoIntense GmbH is certified according to DIN EN ISO 9001. The company is headquartered in Berlin, Germany. Further offices are located in Lower Saxony and Bavaria (Germany) as well as in Houston, Texas (USA).
