

More Occupational Safety with EcoWebDesk 9.1

Software release for simple visitor management and hazardous material usage in accordance with REACH

Berlin, November 4, 2016 – The new version 9.1 of EcoWebDesk, the web-based software for health, safety and environmental (HSE) as well as sustainability management, is now released and offers a greatly simplified external company and visitor management. A simple click shows your receptionists which safety instructions a guest has already performed and which ones are still needed. All appointments can now be centrally and comfortably managed from one convenient overview.

Use predefined descriptors about the use of hazardous materials in accordance with REACH regulations. The information from extended safety data sheets is documented in the hazmat form by linking it with the respective use descriptors. This allows users to explicitly name the intended use of every hazardous material in compliance with REACH.

EcoWebDesk is a comprehensive and integrated off-the-shelf software solution for occupational health, safety and environmental (HSE) management as well as sustainability management. In EcoWebDesk, key indicators and business goals can be aligned with operational requirements, environmental protection regulations, legal norms as well as workplace safety requirements and risk management. The software is suitable for management systems according to ISO 14001, ISO 50001 and OHSAS 18001 as confirmed by DEKRA Assurance Services. EcoIntense GmbH is certified according to DIN EN ISO 9001. The company is headquartered in Berlin, Germany. Further offices are located in Lower Saxony and Bavaria (Germany), Linz (Austria) and Houston, Texas (USA).
