

## More Sustainability and Environmental Management with EcoWebDesk 9.1

### Software release for better sustainability reporting

Berlin, November 4, 2016 – The new version 9.1 of EcoWebDesk, the web-based software for health, safety and environmental (HSE) as well as sustainability management, is released. Users can now integrate the environmental indicators from resource-monitoring into reporting tasks in the software module Sustainability. Every sustainability indicator can be linked with an environmental indicator concerning resource inputs/outputs, e. g. water, electricity, waste and materials. When recording an indicator value, the corresponding resource value can be adopted. By reusing existing environmental data, sustainability reporting becomes even more comfortable, saves valuable time and avoids redundancies in the workflow.

*EcoWebDesk is a comprehensive and integrated off-the-shelf software solution for occupational health, safety and environmental (HSE) management as well as sustainability management. In EcoWebDesk, key indicators and business goals can be aligned with operational requirements, environmental protection regulations, legal norms as well as workplace safety requirements and risk management. The software is suitable for management systems according to ISO 14001, ISO 50001 and OHSAS 18001 as confirmed by DEKRA Assurance Services. EcoIntense GmbH is certified according to DIN EN ISO 9001. The company is headquartered in Berlin, Germany. Further offices are located in Lower Saxony and Bavaria (Germany), Linz (Austria) and Houston, Texas (USA).*
