

EcoWebDesk software wins in the selection procedure organized by the City of Munich

EcoIntense has obtained largest order so far in the public sector

Berlin, August 3, 2017 – EcoIntense won the European-wide tender issued by the Bavarian state capital of Munich to procure web-based software for occupational health and safety. For the Berlin software specialist, this order worth millions is the biggest so far in the public sector. With EcoWebDesk, its online solution for occupational health and safety, environmental as well as sustainability management, EcoIntense prevailed against numerous national and international providers. The aim was to find a standard software that improves all processes in occupational safety and reduces administrative costs. Topics to be depicted in EcoWebDesk include identifying and assessing risks, deriving measures and checking their effectiveness, providing online instructions for staff, reporting accidents and planning audits. The City of Munich announced the result of the selection procedure in June. Necessary IT structures are currently being created and the primary user team of the City of Munich is being trained by the software specialists of EcoIntense.

EcoWebDesk is a comprehensive and integrated off-the-shelf software solution for occupational health, safety and environmental (HSE) management as well as sustainability management. In EcoWebDesk, key indicators and business goals can be aligned with operational requirements, environmental protection regulations, legal norms as well as workplace safety requirements and risk management. The software is suitable for management systems according to ISO 14001, ISO 50001 and OHSAS 18001 as confirmed by DEKRA Assurance Services. EcoIntense GmbH is certified according to DIN EN ISO 9001. The company is headquartered in Berlin, Germany. Further offices are located in Lower Saxony and Bavaria (Germany), Austria and Texas, USA.
