

Precise workflows with EcoWebDesk 10.2

The software for occupational safety and environmental management EcoWebDesk has new features. Version 10.2 is available in 14 languages. Moreover, it's now easier for users to collaborate with internal and external stakeholders.

Berlin, 17 April 2018 – EcoWebDesk has been optimized for the international market. With the addition of Finnish, Swedish, Danish, and Polish, the software is now available in 14 languages. The new interface with Enhesa, the international legal database, ensures that legal content is synchronized across national borders. Users can now generate reports as standard PDFs, protecting the documents from unintentional editing, which is an important compliance issue for many companies.

Thanks to personalized dashboards and a range of authorization levels, the software makes collaboration between departments easier and more transparent. In version 10.2, companies can define precise workflows for various tasks, e.g. creating risk assessments. As required, tasks can be broken down into several phases: editing, testing, approval, and acknowledgement. These individual tasks can then be assigned to various people. Everything is kept organized and well documented. The integrated email function ensures seamless workflows without time-consuming coordination.

EcoWebDesk is a comprehensive and integrated off-the-shelf software solution for occupational health, safety and environmental (HSE) management as well as sustainability management. In EcoWebDesk, key indicators and business goals can be aligned with operational requirements, environmental protection regulations, legal norms as well as workplace safety requirements and risk management. The software is suitable for management systems according to ISO 14001, ISO 50001 and OHSAS 18001 as confirmed by DEKRA Assurance Services. Ecolntense GmbH is certified according to DIN EN ISO 9001 and DIN ISO/IEC 27001. The company is headquartered in Berlin, Germany. Further offices and partners are located in Germany, Austria, Switzerland, Finland and Texas, USA.
