

Effective processes for your company

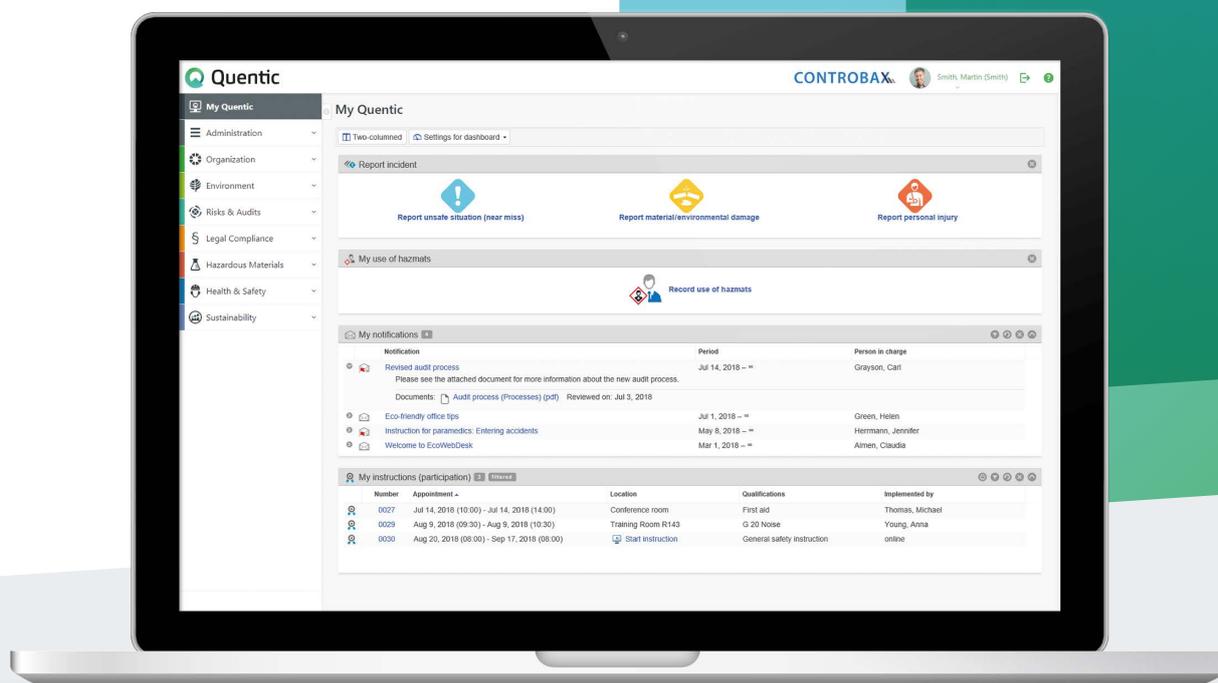

The **Quentic Core** is the foundation not only for your environmental protection and safety policies, but also for all additional Quentic modules. You can visualize company structures, involve employees and create corporate data that is consistent and available from anywhere in the company. Quentic is based on common HSE standards — officially approved.

Visualize company structures in detail

Management of documents and actions

Easily manage user and access rights

Coordinate data flow

Quentic helps you avoid redundancies in the company workflow; data is saved centrally and, by using links, can be made available to all parties concerned. With the Quentic Core, you can record sites, equipment, departments, employees and positions. Links to detailed information can easily be established and remain transparent and automatically up to date. This is effective data management at its best!

Pinpoint improvements

Improve your CIP with Quentic. Identify necessary corrective and preventive actions via cause analyses, easily carried out in a specific component. The responsibilities for all activities are clearly assigned, ensuring that every person involved can keep track of their tasks. You can easily get an overview of the implementation progress and can be automatically informed about deadlines and meetings via email. Implemented improvements can be measured with regard to both quality and quantity.

Keep documents at hand and up to date

You can make important documents available to your colleagues by using the integrated document management system. Version control simplifies the entire process, from document creation to approval. Notifications, triggered by required reviews, ensure that all documents stay up-to-date. This intelligent system also ensures that each user is always accessing the most recent version of a document.

One system for all stakeholders

Quentic enables every user to locate necessary information as quickly as possible. By using the access rights management, it is possible to determine which user can access which parts of the software, making it possible to include environmental protection officers and occupational safety specialists, consultants and the executive board in one single system. Quentic also generates sophisticated reports and tables with the push of a button, enabling you to send information to external parties or supervisors.

Visualize your company structures

Assess the site structure including all buildings, storage areas, machines, consumption meters, etc.

Visualize the organizational structure using departments, individuals, positions and staffing

Keep track of external parties and organizations such as suppliers, disposers, authorities

View a database of equipment and activities

Oversee management

Identify deviations and their reasons in detail via cause analyses

Organize corrective and preventive actions

Determine implementation deadlines and responsibilities, automatically notifying involved parties via email

Record and monitor the implementation progress

Monitor efficiency and track costs

Evaluate all achieved effects with regard to quality and quantity

Document management system

Central document management

Embedded document links make the software more user friendly

Automatic reminder for up-to-dateness check of content

Easy-to-handle version control, convenient document approval feature

Archiving in consideration of retention periods

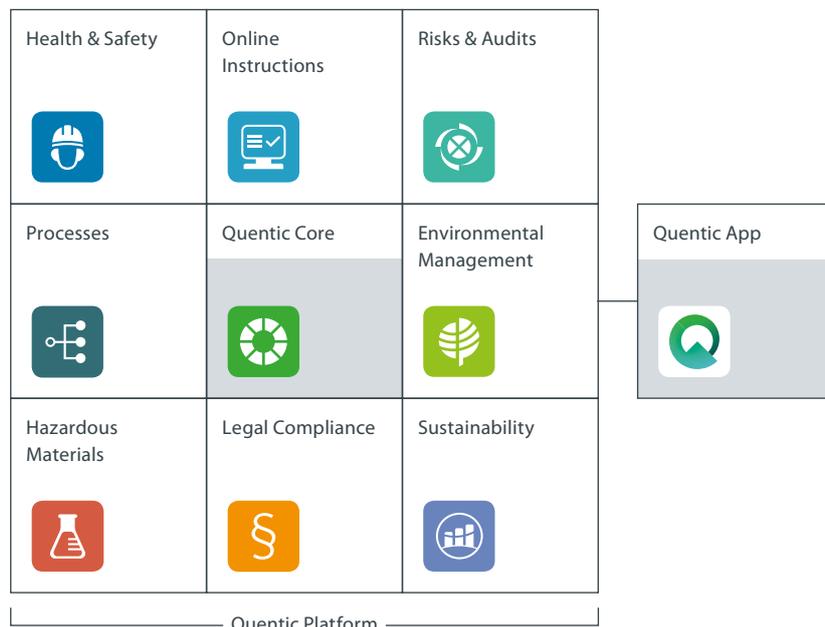

System administration

Manage and regulate individual user access rights

Control basic settings, e.g. automatic email generation

Create reminders and monitor deadlines

Manage report templates

Quentic—software made to order

Quentic supports your health & safety, environmental, energy and sustainability management. Featuring a module-based structure, this online software can be used in many different ways. Simply combine the desired modules to create your individual made-to-order tool.
