

Make workflows clear and efficient

Quentic Processes adds several features to your Quentic Core, enabling you to optimize your business processes, workflow and dataflow. Define clear procedures, visualize organization and process structures and turn your blueprints into a daily work routine.

Rigorous demonstration of processes

Well-arranged diagrams created with little effort

Direct implementation and documentation of steps

Reliable guidelines

Quentic Processes assists you in visualizing, analyzing and executing business processes. You can determine clear rules to be followed and assign responsibilities by defining certain conditions. Utilize the process feature in order to visualize internal processes, instruct employees and enhance your management system.

Diagrams par excellence

With Quentic Processes, you can easily visualize all processes established in your company. This system uses standardized symbols, making all processes distinct and comprehensible. Simply select a symbol, drag it to the desired position, label it, and you're done! Individual process elements are aligned automatically, ensuring proper layout with minimal effort. With only a single click of the mouse, you can generate a PDF file of the diagram.

Clearly defined steps

By using the comprehensible process explorer, you can quickly locate and open required processes. Simply navigate to the desired process step to view all necessary information. With a single click of the mouse, you can be directed to the respective module component within Quentic where you can execute the described process step. Documents can be attached to process elements as well, ensuring processes are directly and efficiently executed in your company.

Visualize company structures

Quentic Processes not only helps you illustrate your company's processes, but also visualize your company structure. Among other things, embedding various data objects effortlessly provides you with an overview of all facilities, including all main permits. You can just as easily establish and visualize the most important relations between various documents.

FEATURES

Model processes

Create extended Event-driven Process Chains (eEPC)

Easy process visualization via drag and drop

Link other Quentic components and data records in order to document and carry out steps

Determine responsibilities and link respective departments and positions

Link documents, internal tools and data objects

Establish links among processes

Generate PDF files from process charts

Define process releases and versioning

Process overviews

Create process overviews to combine and structure related processes

Link individual processes to enable direct transfer from the process overview with one click

Generate PDF files from the process overviews

Process explorer

Quick access to all processes and process overviews

Comprehensive display of process diagrams and vital information

Navigate through the individual process steps

Quentic—software made to order

Quentic supports your health & safety, environmental, energy and sustainability management. Featuring a module-based structure, this online software can be used in many different ways. Simply combine the desired modules to create your individual made-to-order tool.
