

Design EHS and  
CSR digitally.

**With a solution that unites.**

## **Your challenge:**

Strict legal duties.

Multiple stakeholders.

Increasing complexity.

---

## **Our solution:**

A clear focus.

A shared idea.

A simple system.

---

## Network yourself. With Quentic.

### **Link data.**

Quentic is the integrative software solution for your EHS and CSR management. Finally, information from all work areas can be connected seamlessly. Evaluate your company's performance from different perspectives with pinpoint precision. Discover connections and new opportunities. Accelerate your decisions and control your EHS and CSR processes centrally.

### **Connect stakeholders.**

Quentic is more than a data software: Bring various EHS and CSR stakeholders together in one system. Create seamless transitions between workflow steps, both internal and external. Achieve greater awareness of occupational safety and environmental protection. With Quentic, all parties are informed optimally and act in concert—mobile on the go as well as by application at the workplace.

### **Inspire people.**

The simpler the process, the faster the goal is achieved. As one of the leading providers of EHS and CSR software, we aspire to create clarity and guidance in a complex business environment and to promote exchange in the EHS/CSR community. We will only be happy when you're happy—with solutions that are 100% suited to you and your daily tasks.

# Your quantum leap forward. Experience the Quentic advantages.

- ✓ ISO 14001
- ✓ ISO 45001
- ✓ ISO 50001

# Welcome to the Quentic Community.

Exchange with our users is important to us. Be there: in person at our growing annual user convention and online in our Quentic Community.

[community.quentic.com](https://community.quentic.com)

Quentic provides advantages for every company, from medium to large, for local as well as global players. Our users from various industries can confirm this. The range includes everything from utilities and waste disposal companies to production companies, logistics companies, and service providers.

How does it work? Quentic is a standard software that is so flexible it can be tied to your company's individual processes. Company-owned structures such as locations, facilities, processes and tasks can be retrieved with perfect precision in your Quentic system.

„Intuitive to control and easy to use.“

**Dr. Werner Wahlers**

Quality Management & Technology

INEOS Phenol GmbH

„The effort to enter, review and evaluate data has been reduced significantly.“

**Markus Schönberger**

Sustainability Controlling

Voith GmbH

„Ensures seamless  
and legally secure  
documentation.“

**Nicolas Tauchnitz**

Compliance Management

Berliner Wasserbetriebe

„Exchange across countries, divisions  
and departments has taken place  
since the introduction that did not  
exist before in this form. Cooperation  
and knowledge sharing have  
increased significantly.“

# Across all departments. Always the perfect solution.

Whether you work with a handful of colleagues or a hundred:  
In Quentic, every user gets access to the exact work areas, data sets  
and documents he or she needs. So everyone can concentrate fully  
on their essential tasks.

## Fast access for users in a hurry.

You don't have much time and you like things simple and direct? Your personal overview *My Quentic* shows you everything you need to know. From there, you can get going with just a few clicks and check off all necessary tasks quickly.

## Precise information for in-depth users.

You want to have the whole picture? Quentic provides detailed information in each of your areas of expertise. Clear, uniform data masks facilitate the management of complex issues. Details on reviews and approvals give you additional insight.

## Finished packages for external parties.

You can also integrate external contributors into Quentic, which makes cooperation much easier. In addition, select information as well as complete reports can be converted into common data formats with a click of the mouse and sent by email to external parties.

# One integrated system. Infinite possibilities.

You have the perfect choice! Combine the software modules you need into your individual Quentic Platform. With the Quentic App, you can connect through your smartphone while on the go.

## **We are there for you. No matter how much or how little you need:**

Advice on module choice

Workshops and training

System implementation

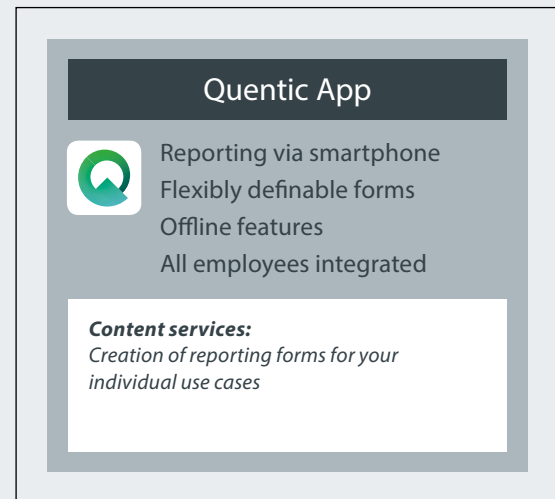

Data migration and synchronization

Content services

Supervision of national and international rollouts

User support

International partner network

# Clean technology. Secure data.

The SaaS version of the Quentic Platform offers you secure access directly from the internet.  
Get started conveniently through your browser.

And that’s not all: Software as a Service provides you with many other advantages. We take care of the hosting and all system updates for you. So you don’t need to do anything else.

- No installation necessary
- Maximum availability
- Work no matter the location
- Low monthly costs
- Every update integrated immediately
- No additional expense for system administration
- Hosting in a certified high-security data center:  
ISO 27001 and 5 stars in the eco data center Star Audit
- Green IT: Complete hosting with eco-power and  
above-average energy efficiency

**Our company is certified.**  
We have high standards of quality and data security. Our own management is designed in accordance with ISO 9001 and ISO 27001. This has been confirmed in external audits.

Registry no.: 481809

## Always there. Even on the fly. **Immediate reporting with the Qentic App.**

The Qentic App allows you and your colleagues to conveniently transmit incident messages, inspection records, test results, and much more by smartphone—even without separate access data. With the flexible, customizable reporting forms and photo and offline features, all of your application cases are completely covered.

**Incredibly comfortable:** All the data collected by the app will also be integrated into the Qentic Platform. Thus the further processing and evaluation is done seamlessly and centrally by the responsible offices.
